### **Education**

2003 **GRADUATED** 

Anaheim High School

# **Expertise**

- Demand Planning & Forecasting
- Production Scheduling & Coordination
- Inventory Management
- Lean Manufacturing & Process
  Optimization
- Data Analysis & Reporting
- Cross-functional Collaboration
- Supply Chain Management
- Process Improvement & Cost
  Reduction
- ERP & Planning Software (e.g., SAP, Oracle)
- Project Management
- Problem Solving & Root Cause Analysis
- Time Studies & Workflow Design
- Quality Control & Compliance

## Language

English Spanish

# **JUAN REYNOSO**

Here's a professional summary that encapsulates your experience across roles in demand planning, production planning, and industrial engineering:

Results-driven professional with extensive experience in demand planning, production scheduling, and industrial engineering within the food manufacturing industry. Proven track record of optimizing inventory management, enhancing production efficiency, and implementing process improvements to achieve operational excellence. Skilled in data analysis, cross-functional collaboration, and utilizing lean methodologies to streamline operations and reduce costs. Adept at aligning supply chain and production strategies to meet business objectives and drive continuous improvement.

# **Experience**

### **P** 2018 - 2024

### JBS / WILDFORK FOODS

### **Demand Planning Manager**

- Optimized demand planning, reducing stockouts by 20% and improving product availability.
- Collaborated with sales, marketing, and supply chain to create accurate demand forecasts.
- Utilized forecasting tools, reducing excess inventory by 15% and cutting holding costs.
- Led continuous improvement initiatives, increasing operational efficiency by 10%.

#### 2016 - 2018

**Production Planner** 

### JBS - Riverside, Ca

- Managed production schedules to ensure on-time delivery, optimizing resource allocation and minimizing downtime.
- Coordinated with procurement, logistics, and operations to align production plans with supply chain and demand requirements.
- Monitored inventory levels and adjusted production plans to prevent shortages or overstock situations.
- Improved production efficiency through process optimization, contributing to a 10% increase in output.

### 2013 - 2016

Industrial Engineer

### JBS - Santa Fe Springs, CA

- Analyzed production processes and implemented lean methodologies, reducing waste and increasing efficiency by 15%.
- Developed and optimized workflows, leading to a 10% improvement in overall production capacity.
- Collaborated with cross-functional teams to design and implement process improvements, ensuring compliance with safety and quality standards.
- Utilized data analysis and time studies to identify bottlenecks and improve resource allocation, enhancing operational performance.
